Projects

- **InterPrep : Interview Preparation App** [Source Code] [Live Link] *April 2025*
Built using Next.JS, TailwindCSS, Vapi AI & Gemini AI
Developed a Mock Interview Preparation Platform.
Features : Voice commands based interactions using Vapi, to create user-defined interviews.
Feedbacks on attempted interviews powered using Gemini AI.
- **iPhone 15 Pro Website Clone:** [Source Code] [Live Link] *January 2025*
Built using React.JS, THREE.JS, HTML and TailwindCSS
Developed a feature-rich clone of the iPhone 15 Pro website.
Implemented interactive components, including a functional carousel and a 3D model viewer powered by THREE.js.
- **Samsung.com Website Clone:** [Source Code] [Live Link] *February 2025*
Built using React.JS, HTML and TailwindCSS
Developed a static samsung.com replica.
Implemented interactive components such as video & image carousels and flexbox-based layouts to closely match the original website.
- **Personal Portfolio Website :** [Source Code][Live Link] *(Ongoing)*
Built using React.JS, Three.JS, GSAP & TailwindCSS
My portfolio website to showcase my projects & skills.
